UTILITY BILLING INFORMATION SYSTEM (UBIS)

This is to certify that we, at Dewan Bandaraya Kuala Lumpur Jabatan Pengurusan Perumahan, have engaged the expert services of Powercomp Automation Sdn. Bhd. to provide a Utility Billing System Solution since 1999. This expert IT system solution, known as UBIS suite, covers the backend consumer database, the Sport Meter Reading System and the Receipting System. The UBIS also interfaces with the SAP Financial System Solution in our central computer.

To date we have acquired a total number of 11 sets of Radix field equipment and the system has been serving us well and meeting our organization goal.

Over the years, we experienced certain degrees of staff turnovers. The new staff who replaced them did not find any difficulties in using the system. This is largely due to the user-friendly features of the system and the good support from Powercomp.

Yours truly,

SEIK CHOON
