TO WHOM IT MAY CONCERN

Utility Billing Information System (UBIS)

This is to confirm that GAS MALAYSIA SDN. BHD. has been adopting a utility billing information system solution, the UBIS suite, developed by Powercomp Automation Sdn. Bhd. since 1999. This UBIS suite comprises the Spot Meter Reading System, the Receipting System and the backend consumer database system.

With the growing business needs and the confidence of this system, we have increased the number of field equipment to 30 sets distributed over all our branches throughout Malaysia. The UBIS suite has served us well and has met our organization goal.

We are happy with the UBIS solution and professional support services of our vendor.

**Yours faithfully,
GAS MALAYSIA SDN. BHD.**

**ROHINI AJAGAPPAN
Assistant Manager, Billing
Accounting & Finance**
