TO WHOM IT MAY CONCERN

Utility Billing Information System (UBIS)

Perbadanan Urus Air Selangor Berhad (PUAS) has been using the complete suite of UBIS covering the backend consumer database, the Spot Meter Reading System and the Receipting System since 2000 for our consumer billing and collection operations. This system is developed and supported by our vendor, Powercomp Automation Sdn Bhd.

The system has been implemented with data conversion within two (2) months seamlessly for the whole of Selangor covering 10 district offices and Head Office. The system has been well received by the users from all levels ranging from the Management Officers (MIS) to the field meter readers.

The system covers both hardware and the whole suite of UBIS. Hardware involved are servers, PC (clients workstations), counter receipting machines and field equipments. The scope also covers Local Area Networks (LAN) and Wide Area Network (WAN). The performance of the system has met our requirements as regards billing and collection to a great extent.

Your truly,

PERBADANAN URUS AIR SELANGOR BERHAD

Ir. V SUBRAMANIAM
